- **E** Embed the practice

Early signals, boundaries, visible workload, and help-seeking as a professional skill.

PROFILE

I help women and working teams notice pressure early, name what they feel, and choose one useful next step.

I spent eight years in executive administration, in a law firm and a group CEO's office, so I know how pressure builds at a busy desk. My sessions turn that into short, practical tools people can use the same week.

My work is educational and non-clinical. I do not diagnose or treat any condition. When someone needs qualified professional care, I say so and help them find it.
